

SCHOOL PHILOSOPHY

We believe that all students should have an equal opportunity for an education, regardless of race, creed, color, social status, or religion.

Education must be considered a process of growth in which the individual is motivated by the controlled environment of the total community.

It is the duty of the school and community to help each and every boy and girl develop their potentials to the highest degree possible. Each student should gain, in addition to fundamental skills, the development of self-discipline, self-esteem, respect for authority, and acceptance of responsibility for his own actions.

It is our belief that all students have a place in society and we will endeavor to help all students attain success. While each student is individually different, we will strive to motivate and counsel him/her to meet the challenges of today and tomorrow.
