

Montpelier Public School

T. Tornado Safety Information and Drill

1. The alarm for a warning of an approaching tornado will be three blasts of the alarm.
 - a. When the alarm sounds, the students in grades 7-12 will take cover in the assigned shower rooms directly west of the stage. The position providing the most safety will be taken - that is to get on your hands and knees, crouch down and cover your head with your hands.
 - b. Students in grades K-6 will take protection in the hallways of the elementary building.
